

UPC Privacy Policy

Last updated: August 2026

UPC ("the app," "we," "us") is a prediction game for combat sports events. This policy explains what information we collect, why, and how it's handled.

Information We Collect

Account information

When you create an account, we collect your email address and a display name you choose. Your password is never stored directly — it's securely handled by our authentication provider (Supabase).

Your picks

When you make predictions on upcoming events, we store your selections (winner, method, round) tied to your account.

Usage information

We do not collect analytics, tracking data, advertising identifiers, or location data.

How We Use Your Information

- To let you sign in and access your account
- To display your display name and picks to other users of the app, for the purpose of the leaderboard and prediction game. This means your display name, your pick history, and your win-loss record are visible to anyone else using the app, not just people you know.
- To calculate and display leaderboard standings based on your picks

What We Don't Do

- We do not sell your information to anyone
- We do not use your data for advertising
- We do not share your data with third parties, other than the infrastructure providers (Supabase) required to run the app

Data Storage

Your account information and picks are stored securely using Supabase, a third-party database provider. Data is transmitted using encrypted connections.

Your Rights

You can delete your account at any time from within the app, under Account settings. Deleting your account permanently removes your profile, your picks, and your login credentials. This cannot be undone.

Children's Privacy

UPC is not directed at children under 13, and we do not knowingly collect information from children under 13.

Changes to This Policy

We may update this policy from time to time. Continued use of the app after changes means you accept the updated policy.
